

AmmoGone

AMMONIA REMOVER

Quickly starts and inoculates biological filters

- ⚡ Fast and effective removal of ammonia, nitrite, and nitrate
- ⚡ True nitrifying bacteria delivered in gel packs
- ⚡ Safe for all aquatic life

AmmoGone is the only true nitrifying bacteria available on the market, offering a quick and effective solution for removing ammonia, nitrite, and nitrate. To ensure optimal performance, nitrifying bacteria must be kept refrigerated and are shipped directly from the manufacturer for immediate use.

One gram of AmmoGone treats 1,000 gallons and serves as a highly concentrated microbial blend that activates biofiltration. It can quickly restart challenging biological filters by providing an immediate source of nitrifying microorganisms for the biochemical oxidation of ammonia and nitrite. Always refrigerate AmmoGone to maintain its effectiveness.

Product Information

UNIT SKU	SIZE
35.4401	2.5 oz

Application Rate

POND SIZE	RATE PER WEEK
Up to 1,000 gallons	1 gram
3,000 gallons	3 grams
5,000 gallons	5 grams

SuperNatural products are manufactured following Good Manufacturing Processes for "General Principles of Food Hygiene". Failure to use as directed on label or changes in water conditions not consistent with label may result in loss or injury to aquatic life.
