

# InstaClear

POND FLOCCULENT

## Clears water within 4 to 8 hours

- ⚡ Rapidly clears cloudy pond water by
- ⚡ Binds debris particles together and drops them to the pond bottom
- ⚡ Safe for all aquatic life

InstaClear cleans water through a process called flocculation. It works like a magnet, attracting and gathering debris in the water. As InstaClear mixes with the particles in the water column, it binds them together, causing them to settle at the bottom of the pond where they can be easily removed by the filtration system.

InstaClear can be used as a routine maintenance clarifier or on an as needed basis when problems arise. Apply **ONLY** once a week. Do not overdose. Keep aeration running continuously during application. Do not use other water treatments in conjunction with applications of InstaClear.

### Product Information

UNIT SKU	SIZE
35.2001	16 oz
35.2002	32 oz
35.2003	1 gal

### Application Rate

POND SIZE	RATE PER WEEK
Up to 1,000 gallons	2 fl oz
2,000 gallons	4 fl oz
5,000 gallons	10 fl oz

SuperNatural products are manufactured following Good Manufacturing Processes for "General Principles of Food Hygiene". Failure to use as directed on label or changes in water conditions not consistent with label may result in loss or injury to aquatic life.
