

MuckRid

Permanently removes muck, sludge and odor

- ⚡ Rapidly removes muck, sludge and odor
- ⚡ Breaks down organic material including leaves, twigs and fish waste
- ⚡ Easy to apply tablet application
- ⚡ Safe for all aquatic and domestic life

MuckRid Tabs permanently eliminate muck and sludge from the pond bottom, including areas around and between surrounding ledge rocks. These organic materials include fish waste, uneaten fish food, decaying leaves, grass clippings, and other dead or decaying matter.

Use MuckRid weekly to prevent organic buildup at the pond bottom and any submerged surfaces. To minimize pond muck and sludge, avoid overfeeding fish and ensure your filters are functioning properly to capture organic material before it settles.
