

# PondPrep

DECHLORINATOR

## Conditions tap water by removing chemicals

- ⚡ Makes tap water safe for fish and plants
- ⚡ Removes chlorine, chloramine, ammonia and heavy metals
- ⚡ Adds slime coat protectant
- ⚡ Safe for all aquatic life

PondPrep rapidly eliminates chlorine, chloramine, ammonia, and heavy metals while enhancing a protective slime coat for fish. It conditions the water by removing chemicals found in tap water that are safe for humans but harmful to fish if not treated.

Before adding fish to the pond, treat the water with PondPrep to ensure a safe environment. Apply the specified amount of PondPrep based on the total water volume. Use it when filling a new pond or whenever adding water to an existing pond due to evaporation. Apply once a week only, and avoid overdosing. Do not use other water treatments alongside PondPrep applications.

### Product Information

UNIT SKU	SIZE
35.5001	16 oz
35.5002	32 oz
35.5003	1 gal

### Application Rate

POND SIZE	RATE PER WEEK
Up to 1,000 gallons	1 fl oz
2,000 gallons	2 fl oz
5,000 gallons	5 fl oz

SuperNatural products are manufactured following Good Manufacturing Processes for "General Principles of Food Hygiene". Failure to use as directed on label or changes in water conditions not consistent with label may result in loss or injury to aquatic life.
